

Please reject the NABs petition 04-160 because I pay for the satellite radio services and have the right to listen to the channels I pay for. I travel across the country and use the satellite radio for current weather and traffice upon entering the various states I travel. Not having to surf for the local stations as I travel is safer from a driving stand point. The stations I pay for on XM radio are not available in local markets. When I choose to listen to a local station I do. Having the choice of stations and programming is my right as a citiizen.
